PDF Viewer

RadPdfViewer for Xamarin is a control that is able to show PDF files natively within your Xamarin application without the need for an external viewer.

The main functionality of the control is listed below:

Scroll, Pan and Zoom	Viewing Modes
One can utilize well-known tools with an intuitive interface to scroll, pan and zoom the content of the document.	There are two viewing modes. Single Page View displays one page at a time. Continuous Page View displays pages in a continuous vertical column.
Jump to a specific page	Fonts Support
To replace the one currently displayed page in the Navigation toolbar, type the page number in the entry.	Built-in support for TrueType , Type1 and CID fonts.

Some of the components that the PDF viewer is capable of distinguishing between are:

1. Images

2. Different font families and font sizes, Unicode support:
